Tampilan Utama.

Proses Register

Proses Login

The screenshot shows a web browser window with the URL `auth.test/login`. The page features the Laravel logo at the top center. Below it is a login form with the following elements:

- Email:** A text input field containing `temonganteng@gmail.com`.
- Password:** A password input field with masked characters (dots).
- Remember me:** An unchecked checkbox.
- Forgot your password?:** A link below the password field.
- LOG IN:** A dark button to the right of the forgot password link.

The browser's taskbar at the bottom shows the system clock as 09:55:00 on 18/10/2024.

Proses Logout

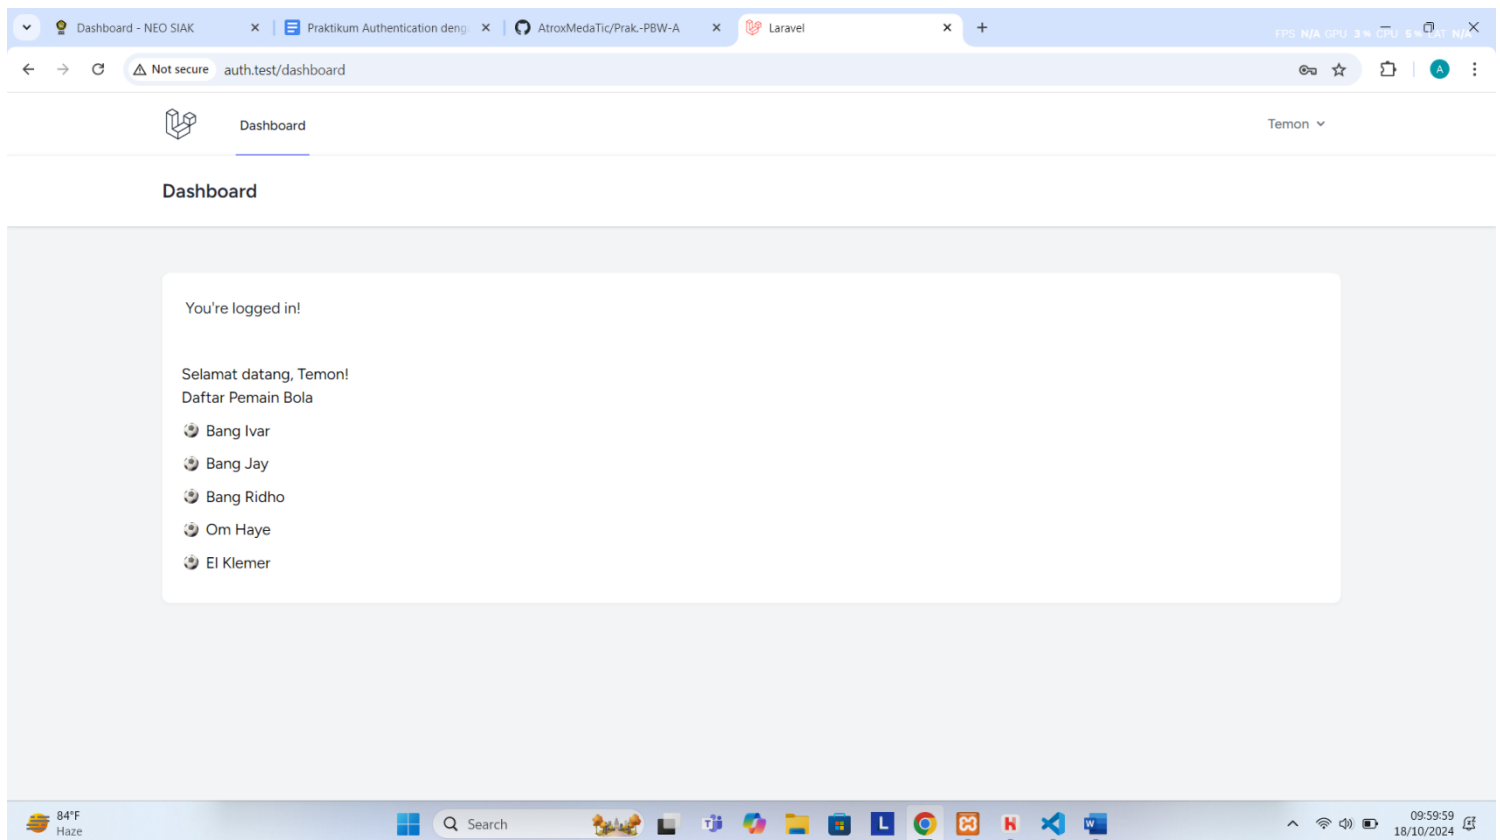

The screenshot shows the Laravel homepage. At the top right, there are links for [Log in](#) and [Register](#). The main content area includes:

- Documentation:** A section on the left with a book icon and a link to `https://laracasts.com`.
- Laracasts:** A card with a video icon, stating: "Laracasts offers thousands of video tutorials on Laravel, PHP, and JavaScript development. Check them out, see for yourself, and massively level up your development skills in the process." with a right arrow.
- Laravel News:** A card with a document icon, stating: "Laravel News is a community driven portal and newsletter aggregating all of the latest and most important news in the Laravel ecosystem, including new package releases and tutorials." with a right arrow.
- Vibrant Ecosystem:** A card with a gear icon, stating: "Laravel's robust library of first-party tools and libraries, such as Forge."

The browser's taskbar at the bottom shows the system clock as 09:58:21 on 18/10/2024.

Tampilan Dashboard

Rangkuman penerapan otorisasi dengan Laravel Breeze!

Laravel Breeze mempermudah penerapan autentikasi dasar dengan menyediakan login, registrasi, dan reset password. Untuk otorisasi, Laravel menyediakan dua mekanisme yaitu *Gate* untuk otorisasi berbasis aturan global dan *Policy* untuk otorisasi berbasis model dan dapat mengintegrasikan aturan otorisasi di controller dan tampilan Blade serta menggunakan middleware untuk mengatur akses halaman tertentu.
